CANCIO PHOTOGRAPHY – 31/05/2023 – 29/11/2024

Taking photos in functions such as weddings, holy communions and more

● HOBBIES AND INTERESTS

nature pictures

I take pictures of the beautiful country of Malta.

I have made this student using the questionnaire which I have received from people. This person had the MCAST website, which wasn't that user-friendly for him. He is diagnosed with ADHD and dyslexia. It was a big headache for him to use the college website. With the help of the information given to me, I tried to help him. He has told me to fix the lettering and the background colour to an off white shade. The lettering was agreed by my questionnaire friends to be Comic Sans. Made it with visual emojis as it is trendy and eye-catching. Steven is looking forward to joining MCAST again with the new website.

The colours:

#000043

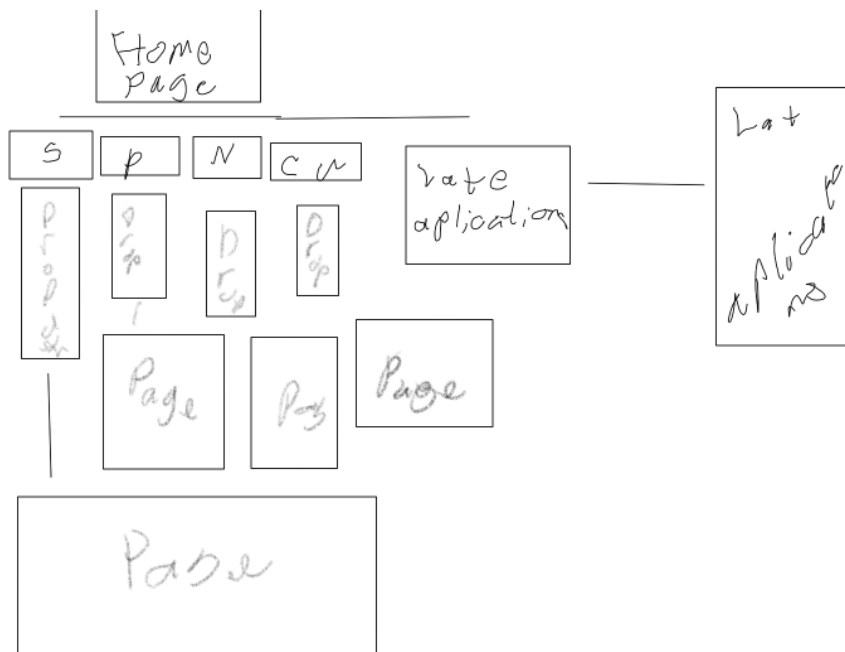

#ffbf2

#717171

It might be a small controversy, but for a mix of ADHD and dyslexic font is

Sans-serif fonts like Arial, Verdana, and Comic Sans

But the best, according to Google, is Comic Sans
